Over the last decade, social interactions models have contributed to a better understanding of the mechanics of urban segregation and persistent inequality. This Summer School is devoted to studying recent advances in models of social interactions and city formation. Two leading researchers have been invited. Rachel Kranton will deliver six hours of lectures on her work on identity and social networks. Kristian Behrens will give six hours of lectures on his research on urbanisation, selection, and sorting. On the final day, participants will have the opportunity to present their papers to the audience. We will select no more than eight such papers.

How to Apply?
Applications are encouraged from any interested researcher, but priority will be given to doctoral students and postdoctoral researchers or the equivalent. Details for application and submission are provided [here](#).

Deadline
Paper submission: 20th of March 2015
Registration without paper submission: 15th of April 2015

Location
Center for Research in Economics and Management - CREM (UMR CNRS 6211), Faculty of Economics, University of Rennes 1 - 7, Place Hoche - 35065 Rennes (France)

No Registration fees
No registration fees are demanded. The Summer School is sponsored by the ANR. It is part of the ANR project “Social Interactions, Stratification and Inequality” (ANR 12-INEG-0002).
